THE 2027 COLLECTION

Bespoke joinery, architectural lighting and complete turnkey interiors — designed by architects, built by craftsmen and delivered as one.

Welcome Home

Your home should feel calm, effortless and quietly impressive. At Grand Design International, architects, engineers and craftsmen work as one team to create bespoke interiors where every surface, light and detail earns its place.

Handleless storage hides daily clutter, while concealed light lines wash every wall in a warm, welcoming glow.

Ten signature concepts and eight colour palettes — every design tailored to your space and lifestyle.

Design Philosophy

We sculpt with light, conceal storage behind calm handleless planes and soften every corner with gentle curves.

Light as a material — warm LED coves and plinth glow. Storage that disappears — floor-to-ceiling push-to-open joinery. Soft, sculpted forms — radiused columns and curved bulkheads that let rooms flow. A home that feels like a five-star suite, every day.

Build, Install & Aftercare

One team from first sketch to final light switch — architects, engineers and craftsmen under one roof, so nothing is lost between design and delivery.

Signature Living

NOIR FIRESIDE — Smoked-oak floating shelves frame a monolithic taupe wall hiding full-height storage, with a linear fireplace as the heart of the room. Colours: Charcoal #121010 · Taupe #6B5D50 · Linen #E8DACD.

FLOATING STORAGE WALL — Six metres of handleless ash-grey cabinets float above a lit display ledge and built-in sofa. Colours: Mist #E3E7E7 · Ash Grey #A2A09E · Light Oak #C2A47E.

Warm Oak Collection

Arched glass display cabinets glow from within honey-oak joinery, while chalk-white handleless wall units float above a lit ledge and built-in sofa. Light, warm and family-friendly.

Palette: Chalk #F6F1E7 · Wheat #D0B48A · Honey Oak #B07A45.

Media & Zoning

Cinema at home, lit like a gallery. Oak-panelled TV walls with floating consoles and under-glow, or a double-sided TV partition on a curved, light-edged platform that separates living from dining — defining spaces without building walls.

Lighting Design

Light is our signature material. Linear coves, plinth glow, shelf lighting and halo mirrors are planned from day one in warm 2700–3000K tones — never added as an afterthought.

The result: glare-free, layered light that makes every evening feel like a boutique hotel.

Three Colourways

One design, three moods. The same fluted moon-mirror lounge with built-in sofa and lit display shelving — delivered in the finish you love.
